Being appointed as a campus ambassador of DAVV by the DevTown team for organizing tech events.

🔧 SKILLS

Languages: C/C++, Javascript, Java, PL/SQL

Front-end: React.js, Next.js, HTML/CSS, Tailwind

Back-End: Node.js, Express.js, REST APIs

Database: Supabase, MongoDB, MySQL, Firebase

DevOps: Docker, Jenkins, GitHub Actions, AWS basics

AI/ML: LLM, Agentic AI, Prompt engineering, Gen AI

Tools: Postman, Github/Git, Figma, Cursor, Vercel

📁 PROJECTS

MessKhata: Live SaaS for Indian Mess Economy

🔗 [Demo-link](#)

Deployed SaaS platform that digitizes the entire mess management lifecycle

- Designed a secure multi-tenant architecture ensuring complete data isolation.
- Served 3+ commercial mess businesses and 200+ monthly active users, process 10,000+ meal transactions.
- Automated customer engagement using WhatsApp and SMS reminder workflows.
- Successfully deployed the product with real users and recurring monthly revenue.

CodeShourya: AI-Integrated Coding Platform

🔗 [Source code](#) 🔗 [Demo link](#)

- Developed a full-stack AI coding-practice platform used for 1:1 interview preparation delivered a full-featured MVP in 2 months.
- Led backend development covering 4 core areas: architecture, API design, database deployment.
- Integrate Gemini API to process NLI, enabling a 24/7 AI assistant for debugging and explanation.
- Tech Stack: React, Node.js, Express, MongoDB, Gemini API, Tailwind CSS, Vite, Testscript.

IoT based project

🔗 <https://github.com/Harshvardhan-Patidar/IoT-Project>

Real time monitoring system

- Designed and implemented an innovative IoT-based solution to detect fuel impurities and unauthorized theft.
- Developed a cloud based platform and provided a real time alert on anomalies in 1 second.
- Demonstrated a potential annual savings of \$1 million by mitigating fuel contamination and theft in industrial and commercial scenarios.
- Employed C++ for it complete development with the help of Arduino Ide.
